

# MARK YOUR CALENDARS NOW!

# EXPO is ONLY held every 3 years!

## NEW PRODUCTS • SEMINARS • 200+ BOOTHS • OVER 2,400 ATTEND

### TESTIMONIALS FROM 2017 EXPO ATTENDEES...

"I try never to miss the expo. I've been attending the last five shows. They are informative and keep me in touch with various vendors that I have done past business with and meet new contacts as well."

"I have nothing to compare too, but I like that the Expo and seminars are all in ONE location. The parking is a huge plus too. I have no problems driving a little farther. The benefits outweigh the little extra travel time."

"I think every year it gets better. I was able to find lots of products that we need for our facility."

"I think it is good for anyone new in the industry to be able to get a good hands on feel for materials used in construction. Being a new engineer out of college, most time is spent behind a desk. If someone doesn't have a good understanding of how construction is actually done, it makes designing hard. Any place to see any kind of typical materials and tools would be helpful for new people in the field."

### What the Internet/apps don't offer you... that Expo 2020 can provide ALL IN ONE VENUE:

- See firsthand and handle new products available...lighting, tools, wiring, generators, etc.
- Find out more about energy efficient products/services that could save \$\$\$ for your company;
- Meet many different manufacturers which allows you to discuss YOUR specific needs with them;
- Bring younger members in your company so they can gain exposure to the industry;
- You can compare various products/services and find out which will work best in your job setting.
- Network with associates from all segments of the industry who will be in attendance. Over 2,400 attended in 2017.

### Educational Seminars Offering PDHs/Code Education Contact Hours

We offer 10+ seminars during the two-day event, beginning early each day. There is an additional cost for these seminars (1 or 2 day passes). In 2017, we had over 1,900 people attend these seminars. Please visit our website, [www.electricalboard.org](http://www.electricalboard.org) for complete information regarding these seminars and to sign up for Expo only and/or seminars as well in mid-January 2020. The seminars offer professional development hours (PDH) for engineers and CODE contact hours for electrical license holders for Jefferson County and City of St. Louis. **(There is an additional cost for seminars.)**

### 2020 SEMINARS:

The seminar topics are currently being evaluated and will be listed on our website later this year. We will be offering a 2-hour Grounding seminar. To fulfill the license renewal requirements of both Jefferson County and City of St. Louis, we will be offering an 8-hour Code Conference on March 12th.

**Registration BEGINS ONLINE MID-JANUARY 2020.**  
[www.electricalboard.org](http://www.electricalboard.org) No phone registrations are taken.

### IAEI CODE CONFERENCE – Analysis of the 2020 NEC (March 12)

Attendance at this conference will fulfill the City of St. Louis Requirements for continuing education... provided THE LICENSEE attends the entire 8 hour session. The City now requires 8 Code hours EACH year. We have 400+ attendees for this conference most years. In the past, we turned away people who wanted to register at the door... so make sure you take advantage of this seminar and register by February. **(This is NOT part of the one or two day passes. Individual cost for this conference.)**

**ELECTRICAL CONTRACTORS...** PLEASE NOTE: Attendance at this conference will fulfill City of St. Louis' requirement for continuing education... provided the LICENSEE attends the entire 8 hour session. Photo IDs will be required at the conference this year.
