## Get a Free Fleet Electrification Analysis

Thinking about electrifying your fleet? Start your planning with Ameren to learn how making the switch to electric fleet vehicles can benefit your business. **Ameren is seeking key partners in our region to participate in a limited number of free fleet operation studies.**

Ameren has contracted with the leading national fleet solutions provider eIQ Mobility to provide a select group of key customers a free fleet analysis. The process has been designed to be as simple as possible, using your fleet's data to provide a detailed analysis of technically and financially viable opportunities.

The study will provide information on:

- **EVs:** Lowest cost vehicle recommendations to meet your needs
- **EV Chargers:** Lowest cost charging recommendations based on your specific location and needs
- **Total Cost:** Estimate EV to ICE equivalent total cost of ownership
- **Sustainability:** Compare EV to ICE total emissions

The national trend for fleet vehicle electrification is gaining momentum. No matter where you are in the planning process, Ameren is here to help their business customers prepare for the future.

Electrification Benefits:

- Establish your organization as a leader in innovation
- Realize your commitment to sustainability
- Foster employee satisfaction and pride
- Electrified fleets **SAVE MONEY**

**Ameren is your energy advisor and is here to help** throughout the electrification process. Early engagement with Ameren is your key to cost-effective implementation of electric fleet vehicles.

Support includes:

- Fleet analysis (limited availability)
- Assessment of existing load potential
- Rate advisement
- Consultations and support throughout the process

**Contact them to secure your free fleet analysis today!** Email : [kkresyman@ameren.com](mailto:kkresyman@ameren.com)

## INDUSTRY NEWS

**Schaeffer Marketing Group** is excited to announce that Bruce Eason, Don Calcaterra, Tyler Kisro, and Ellen Eason of LEC & Co. have joined their team. They bring over 125 years of lighting experience.

Bruce and Don will cover some distributor, contractor and specifier accounts while Tyler focuses on specifiers. Ellen offers lighting design services as well as covers inside sales for some electrical lines. Lighting services provided include project design, photometric layouts, utility incentive calculations, payback analysis, and job management.

## Ameren welcomes four more energy companies as Midwest utilities expand nation's largest interstate electric vehicle charging collaborative

In 2020, Ameren announced a first-of-its-kind collaboration among energy companies that committed in good faith to build an extensive network of electric vehicle (EV) charging stations across the Midwest. On March 16, Duke Energy, MidAmerican, Liberty and Midwest Energy joined the existing group of six utilities to support the growing use of electric vehicles. With this network of stations, EV drivers will be able to travel 1,200 miles from Detroit to Colorado – and points in between – with confidence there will be ample locations to recharge along the way ([link to map](#)).

The automotive industry expects EV adoption to grow from 1.5 million to 18.7 million vehicles by 2030. To meet the demand, an estimated 9.6 million public EV charging stations will be needed. Only about 100,000 stations are in service today, which is why Midwest energy companies are joining forces to support cleaner transportation.

The four energy companies, serving customers in Arkansas, Illinois, Indiana, Iowa, Kansas, Kentucky, Missouri, Ohio, and Oklahoma, are the newest companies to sign the Memorandum of Cooperation already in place among Ameren Illinois, Ameren Missouri, Consumers Energy (Michigan), DTE Energy (Michigan), Evergy (Missouri and Kansas) and Oklahoma Gas and Electric. Midwest Energy is the first member-owned electric cooperative to join the agreement with investor-owned utilities.

"We recently set our own goal to achieve net-zero carbon emissions by 2050," said Marty Lyons, chairman and president of Ameren Missouri. "That means looking internally to transition more of our own energy generation to renewables, as well as thinking about how we can help other industries reduce their own carbon footprint. Transportation is the largest source of greenhouse gas emissions in the United States, which is why we're making it easier for consumers and businesses to charge and use EVs."

Ameren has its own plans to be part of the EV revolution. By 2030, Ameren intends for 100% of its new light-duty vehicle purchases to be electric. In addition, Ameren will electrify 35% of its overall vehicle fleet, including light-duty, medium-duty, heavy-duty, forklifts and ATV/UTV by 2030.

"In the Midwest, large cities are connected by vast rural areas, so drivers spend more time on the road and travel longer distances," said Richard Mark, chairman and president of Ameren Illinois. "The EV movement is happening, and we're proud to be part of a coalition that will help to provide motorists with convenient and economical charging options throughout the region."

Utility programs supporting the Memorandum of Cooperation are subject to regulatory approvals and aim to have the charging infrastructure in place by the end of 2022.
